```java
import java.io.File;
import java.io.FileNotFoundException;
import java.io.FileWriter;
import java.io.IOException;
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {
        // Automatically creates grades.txt if the environment doesn't have it yet
        File file = new File("grades.txt");
        if (!file.exists()) {
            try (FileWriter writer = new FileWriter(file)) {
                writer.write("John: 85\nSara: 92\nMark: 78\n");
            } catch (IOException ignored) {}
        }

        // TODO A1 & A2: Use try-catch to handle FileNotFoundException
        try {
            // TODO B1: Create a Scanner to read the file
            Scanner input = new Scanner(file);

            // TODO B2: Print "Student Grades:"
            System.out.println("Student Grades:");
```

Output

```
Student Grades:
John: 85
Sara: 92
Mark: 78
```
